

# Reflector for photoelectric sensor 50x50 LHE HT ZSB

## REFLECTOR DATA

Application	Reflector for photoelectric sensor
Item	50x50 LHE HT ZSB
Item no.	07662571

## TECHNICAL SPECIFICATIONS

Shape	angular
Size (LxWxH)	60,3x51,4x8,5 mm
Reflective size (LxW)	47,9x47,25 mm
Tolerance	TG5 [DIN 16742]
Mounting	to be screwed
Chemical resistance	Standard
Protection	IP40
Operating temp.	-20°C to +120°C
Surface	Standard
Optical structure	hexagonal
Optic size	Standard triple SW4
Polarizing rotation	yes
Application	Standard sensors

## MATERIAL DATA

Material reflector	PC clear
Material bracket	PC grey

## DESCRIPTION

Reflectors of this type are made of high-temperature-resistant plastic, which is characterized by a very high heat resistance and at the same time has very good optical properties. As a result, the reflectors are temperature-resistant up to 120 °C, the reflection properties correspond approximately to those of the standard reflectors. For air exchange, they are equipped with a vent hole. If watertightness is required, the reflectors can be provided with an additional membrane.
