DESCRIPTION

For simple applications with photoelectric sensors or for use on warning signs, traffic signs and markings, the T-1500 reflective tape on a glass ball basis is suitable. The tape is not suitable for use with photoelectric sensors with polarizing filters. The reflective tape is UV-resistant, has a self-adhesive backing and is suitable for outdoor applications. There are many colors available. The film can be punched and cut and is available in rolls of 45.7 m in length and up to a width of 1220 mm.
