

Reflective tape

T7500 100x100mm

REFLEKTOR DATEN

Application	Reflective tape
Item	T7500 100x100mm
Item no.	04186112

TECHNICAL SPECIFICATIONS

Shape	angular
Size (LxWxH)	100x100x0,4 mm
Reflective size (LxW)	100x100 mm
Tolerance	TG5 [DIN 16742]
Mounting	to be glued (with tape)
Chemical resistance	Standard
Protection	IP67
Operating temp.	-20°C to +65°C
Surface	Standard
Optical structure	rhombus
Optic size	micro triple SW0,3
Polarizing rotation	yes
Application	Standard sensors

MATERIAL DATA

Material reflector	PMMA clear
--------------------	------------

DESCRIPTION

A very high reflex performance is offered by the reasonably priced standard reflective tape T7500 with micro prism structure. The reflective tape is very well suited for applications with standard photoelectric sensors and laser distance measuring devices. It can be used at temperatures from -40 °C to +70 °C and is suitable for outdoor use. In addition to UV resistance and a shelf life of up to 10 years, the self-adhesive backing and the stampability and cuttability are further features that characterize this product. The T7500 reflective foil is available as rolls up to 45.7 m in length and up to a width of 1220 mm and as shapes and stamped parts.
